WinEUR FIXED ASSETS

This module allows you to manage fixed assets essential to operations. The integration of this module with WinEUR ACCOUNTING enables:

- identification of all fixed assets,
- follow up on acquisitions, depreciations and sales.

PRODUCT HIGHLIGHTS

- ✓ Track fixed assets and depreciation
- Automatic accounting of depreciation entries by period
- Matrix reports with graphs
- Optional: integrated with accounting and other WinEUR modules (WinEUR ARCHIVE and WinEUR ANALYTIC)

Technical aspects

ASSET FILE

- Notion of insurance value (new value, replacement value)
- Location of the asset and record according to location (building, floor, a room, a cabinet,...)
- Documents (expertise, registration, visits, plans, serial number, licences, user manuals)
- · Photos, barcodes, RFID or other
- · Additional fields specified by the user

TRANSACTIONS

- Interim or updated (if applicable) book entries
- · Management of gains to existing assets
- WinEUR FIXED ASSETS supports IPSAS standards and in particular the following: name of the asset, description, serial number or unique identifier, purchase date, physical location, person in charge of the asset, useful lifespan, date of revision of the useful lifespan, historic cost, depreciation method, book value, date of sale or disposal

PRINT AND DISPLAY

- Insurance value
- Location, allowing for combinations, ex: by building, by floor, by premises, ...
- · Display of fixed asset movements
- Custom reports
- Print amortisation tables
